

PAD System™

Opticut AutoMarker

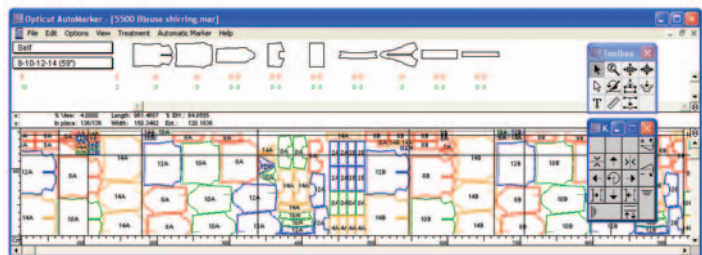

Nesting is made easy by linking your Marker to the original pattern style, allowing pattern changes to be updated automatically in the related marker.

Let Opticut AutoMarker create your markers automatically and plan your fabric purchasing with Opticut AutoMarker fabric estimate feature.

Main features:

- >> Three-step marker set-up: style, fabric width and breakdown
- >> Single Marker file with multiple layers
- >> Possibility to apply different fabric widths on each layer
- >> Piece manipulation and treatment toolbox
- >> Multiple shortcuts that speed up the workflow
- >> Multiple AutoMarker parameters: Symmetry, Spacing, One-Way, Rotation, Tubular, Folded ...
- >> Ability to modify file name, set-up, priority and other parameters at any time
- >> Full View to visualize the entire marker
- >> Copy & Paste function between layers and markers
- >> Copy & Paste options for size modifications and piece symmetry
- >> Import/Export options for extended compatibility
- >> Pattern Refreshment function for piece manipulation
- >> Ability to customize existing notches in the fabric simulation area using the Notch Conversion feature
- >> Ability to create many types of double notches in the notch list

- >> Block and Scale functions
- >> Ability to scale markers and selected pieces
- >> Plaid & Stripe function
- >> Ability to match pieces using guidelines
- >> Ability to view stitch lines in the fabric simulation area, and also print and plot them
- >> Automatic marker making for immediate calculation of fabric consumption
- >> Integrated Opticut View with optimized functions for robotized cutters
- >> Monitor window for batching automatic marker processing
- >> Automatic Fill a Hole tool for optimized fabric consumption
- >> Can be combined with PAD System Plot Network module, for plot files management
- >> Seamless integration of NESTER software for additional reduction of fabric consumption (additional option)

The whole placement can be sent by e-mail in a single file to remote offices for further use.
